Marque Apartments Under floor heating systems

Cambridge's tallest residential building brings luxurious contemporary living to an ancient city.

The Marque is a striking new structure that bridges past and future. It is an iconic new addition to an old city; a building that is daring in design but informed by its surroundings.

Located in the historic centre

Just minutes from the historic centre, the nine-story Marque is perfectly placed for stylish modern living in a old, yet always dynamic, city.

The driving idea behind The Marque is to bring sleek hotel living to Cambridge.

It shows in the way the building has been meticulously designed and finished and in the stunning street approach and entrance lobby.

Design competition

Drafted by two lecturers in the University's Department of Architecture in an open design competition, the building successfully marries style with convenience.

There are life-enhancing facilities such as secure underground parking and bike storage, a strictly residents-only gym and a private garden that's not overlooked by any other building.

Plus, a 24-hour concierge service makes sure residents are constantly taken care of.

Underfloor heating in bathrooms

As part of the overall luxury design and contemporary lifestyle underfloor heating was a must to be installed in the bathrooms.

We contacted DEVI and other suppliers to quote for the project. We felt that DEVI could offer a better solution based on the quality of their products.

DEVI has been extremely helpful and thorough in assisting me throughout the project.

Preston Slade,
Electric Centre

Applications involved

159 pieces of DEVIcomfort™ 150 (DTIR) and DEVIreg™ 535 thermostats

Results of the project

All the products were installed without any issues and minimal input required from DEVI UK technical.

This is the result of a thorough understanding of the project from start to finish by the DEVI team.

Benefits for DEVI

Enhancing brand awareness of DEVI within a luxury development.

A new customer had the opportunity to experience the “DEVI comfort” for the very first time on all levels of the cooperation.

The contractor has been impressed with the products supplied and will look to use DEVI again on future projects.

Preston Slade, Electric Center

“We contacted DEVI and other suppliers to quote for the project. We felt that DEVI could offer a better solution based on the quality of their products.

DEVI managed to get a large quantity of mats on site at short notice when the project started work.

DEVI has been extremely helpful and thorough in assisting me throughout the project.

Our contractor Excelsior Services has been very pleased with the quality and ease of installing the DEVIcomfort™ and Thermostat.”

Project overview:

- DEVIcomfort™ 150 (DTIR)
- DEVIreg™ 535 thermostats.
